Introduction

- This project is a digital system to manage student ID and profiles
- Replaces manual ID cards with digital records
- Stores student details securely
- Easy access and update of student information

Objective

- To create a digital student ID system using Java
- To manage student data efficiently
- To reduce paperwork and manual errors
- To provide quick access to student profiles

Problem Statement

- Manual ID cards can be lost or damaged
- Difficult to manage large student data manually
- Time-consuming verification process
- Lack of centralized system

Results & Discussion

- System successfully stores student data
- Easy retrieval and update
- Saves time compared to manual system
- User-friendly interface

Conclusion & Future Enhancement

Conclusion

- Project achieved its objective
- Efficient student data management
- Improved understanding of Java concepts

Future Enhancement

- Add QR code for ID
- Connect with online database (MySQL)
- Mobile app integration
- Cloud storage
